The device depicted and described hereon embodies proprietary information owned by the manufacturer. All design, manufacturing, reproduction, sales and patent rights regarding this device or drawing reserved except where explicit right is guaranteed in writing. We reserve the right to make design changes.

Drawn by:	Janos
Date:	01/18/2018
Scale:	NTS
Weight:	N/A

MULTI-FLEX PORTABLE MIST COLLECTOR Specification Drawing		
Drawing No.: -	File Name: (02-065) Multi-Flex - SD	Sheet: 1/4
Material: -		

MULTI-FLEX 1000

SPECIFICATIONS:

- The mechanical oil mist filter has a degree of separation of 95% of oil mists and up to 99.99% @ 0.3 microns of smoke with HEPA filters. These filter boxes have a large filtration area, are washable and are made of fiberglass media with aluminum separators. (The HEPA filters are not washable)
- The FLEXI-I Extraction Arm is a superior extraction arm c/w an advanced design 'Parallelogram' counter balancing system that eliminates the need for continual adjustment of friction joints and allows for an un-paralleled ease of movement. The FLEXI is an ideal solution for most "source-capture" applications. It is also specifically recommended for applications requiring an "easy to position" extractor that does not require constant adjustment. The design is compact and smooth, excellent for areas with low ceiling. The FLEXI Extractor Arm comes standard as 3m (10') long and Ø160mm (6.5") in diameter.
