APPLICATION:

Dust produced by the following processes:

- Deburring
- Grinding
- Finishing

SOLUTION:

Source Capture:

- The dust is captured using one (1) downdraft table

Filtration:

- The DTH 1700 type cartridge dust collector filters the contaminated air and returns it as clean air into the facility.
- Part of the clean air is returned into the enclosure as regain air.

PRODUCT DESCRIPTION:

- One (1) DTH 1700 Dust collector
- One (1) Enclosure and regain air kit for DTH 1700

INDUSTRY:

Industrial steel valves manufacturer

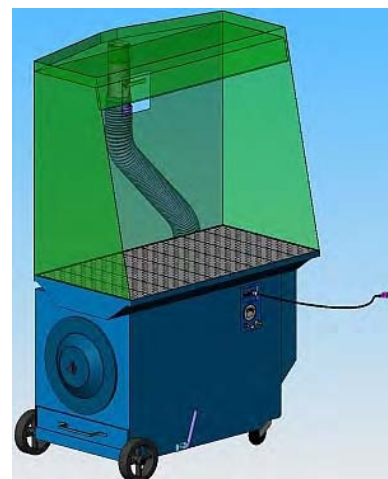

TESTIMONIAL:

"We have been looking for a simple, economic and efficient solution for dust removal and air cleaning, to serve our grinding and finishing processes!

LEV-CO came up with the DTH 1700 dust collector with downdraft table.

This downdraft table works better than any other down draft table we have used before.

Our employees are content with this new and efficient solution."

DTH 1700 DUST COLLECTOR
